ZIPTEx AND WIRETEX FROM ALUKON

THE NEW GENERATION OF SUN PROTECTION

Textile sun protection from ALUKON – modern and at the same time durable in material and design.

The textile curtains are UV-resistant, water- and dirt-repellent and therefore weatherproof. The boxes and guide rails are made of extruded, powder-coated aluminium. These features make ZipTex and WireTex systems a durable and low-maintenance sun protection system for your home.

**More products and innovations can also be found at
WWW.ALUKON.COM**

MORE THAN JUST SUN PROTECTION

ALUKON SYSTEMS HAVE MORE ADVANTAGES THAN YOU THINK

Sun protection

pleasant indoor climate,
even on hot summer days

For large areas

up to 18 m² and a
maximum width of 600 cm

Glare protection

translucent fabric for a glare-free
room atmosphere

Wind resistance

laterally guided curtain for
stable cloth tension even
at high wind loads

Privacy protection

more privacy in
your own home

UV and weather resistant

through the use of high-quality
materials

Easy to care for and low-maintenance

thanks to water- and dirt-repellent curtains

Ease of use

convenient operation via electric drive or wireless motor as well as simple crank operation

Extruded and durable

ALUKON aluminium boxes are particularly robust and durable and impress with their wide range of shapes

Insect protection

at closed ZipTex curtain

Facade design

large selection of different fabrics and colours

Made in Germany

durable, high-quality materials

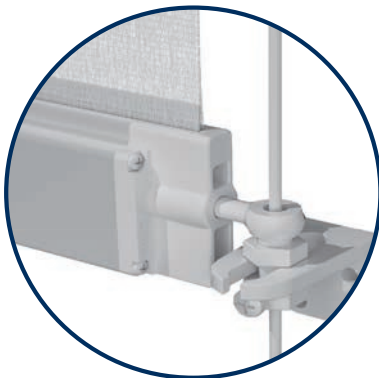

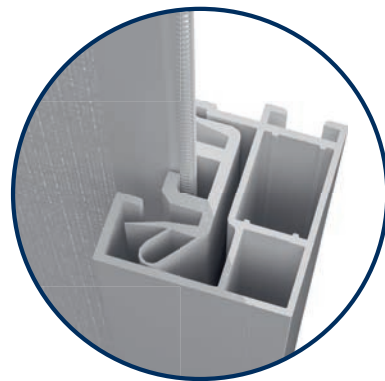

TWO VARIANTS OF TEXTILE SHADE

ALUKON ZIPTEX AND WIRETEX

Textile sun protection systems installed in front of the window provide optimal shade in rooms without completely blocking the view to the outside. This means that particularly large window surfaces can be shaded in a wind-resistant manner and excessive heating of the room can be avoided. In general, we distinguish between two versions of textile sun protection systems, which are defined by the way in which they are guided laterally.

ZipTex – extremely stable lateral guide

- narrow guide rail with plastic zip guide keeps the curtain securely guided on both sides over the entire height
- fabric with side zip guide, which fixes the cloth in the guide rail without a gap
- wind-stable over 100 km/h depending on the installation situation and size
- large areas up to 6 m wide and 18 m²
- in the front box or invisibly plastered in the plaster base or top-mounted box

WireTex – flexible, filigree lateral guide

- lateral guide via the slat bar at the bottom end of the fabric, which is guided on both sides via stainless steel cords
- up to 4 m width and 12 m² surface
- for structural conditions where a guide rail is difficult or impossible to install, such as in front of fixed glazing

A modern, multi-story building with a mix of light grey and dark grey facades. Large windows are visible, some with dark frames. The building is set against a blue sky with light clouds and green trees. In the foreground, there is a concrete walkway and some green plants. A large yellow circle is overlaid on the lower-left portion of the image, containing text.

ZIPTEx

EXTREMELY STABLE SYSTEM

With innovative side zip guide for extremely high stability even with large window surfaces and high wind loads. For special demands on shading systems, also available with glass slip guard protection or integrated viewing window.

SHAPES AND COLOURS

AS A DESIGN ELEMENT FOR YOUR FACADE

Whether you are erecting a new building or upgrading an old one, ZipTex systems provide you with modern, versatile solar protection. Suitable for ALUKON roller shutters and venetian blinds, ZipTex can be integrated into the same boxes and thus adapted to the external appearance.

Set accents

available in all RAL colours in gloss, matt and textured paint coating or anodised version

Stable lateral guidance

zip attached to the fabric guide fixes the curtain in the zip guide

Easy inspection

the external inspection cover enables quick and clean service and repair work

Extruded and durable

ALUKON aluminium boxes are available in a wide range of shapes, extremely robust and corrosion-resistant

PLASTER BASE

ZIPTEX

PLASTER BASE 20°

PLASTER BASE 90°

FACADE-INTEGRATED SOLUTION

INVISIBLE AND FUNCTIONAL

ZipTex in the ALUKON plaster base box can be integrated invisibly into the facade when erecting a new building or retrofitting external insulation.

The invisible solution

ALUKON ZipTex plaster base integrate almost invisibly into the facade

Stable lateral guidance

zip attached to the fabric guide fixes the curtain in the zip guide

Easy inspection

the external inspection cover enables quick and clean service and repair work

Extruded and durable

ALUKON aluminium boxes are extremely robust and available in two plasterable variants

GLASS FALL PROTECTION

CAN BE INTEGRATED IN THE BUILT-ON AND PLASTER
BASE ZIPTEx

The ALUKON fall protection is a modern, discreet solution for floor-to-ceiling windows. It provides unrestricted visibility to the outside and more daylight intake in the rooms.

Planning is carried out directly with the built-on or plaster base ZipTex and can be used in new buildings as well as in modernisations. The 16 mm laminated glass (according to AbP) is inserted into the waterproof, two-part guide rail between the window and curtain and secured in a concealed manner.*

Quick and easy installation

directly with the curtain, therefore
no additional fastening to
the facade is necessary

Tested safety

Glass heights 50 to 110 cm
and system widths up to 280 cm;
with filigree glass edge protection

*Test certificate according to DIN 18008 for use in Germany is available. Under certain circumstances, coordination with local authorities may be necessary. We recommend you to inform yourself accordingly.

TOP-MOUNTED ZIPTEX

INTERNAL INSPECTION

EXTERNAL INSPECTION

FOAMED TOP-MOUNTED BOX

MOUNTED ON THE WINDOW

The foamed top-mounted box AK-FLEX with ZipTex is specially designed for new buildings or renovations together with the entire window and meets the current requirements for both thermal and sound insulation. At the same time, this box offers the highest level of sound insulation, since values (R_w) of up to 47/46 dB can be achieved without additional measures.

The invisible solution

AK-FLEX top-mounted boxes with ZipTex curtain integrate almost invisibly into the facade

Stable lateral guidance

zip attached to the fabric guide fixes the curtain in the zip guide

Easy to install

the box is mounted with an adapter profile directly on the window and installed together

For all installation situations

different wall thicknesses for thermal insulation composite system and exterior plaster

WIRETEX

FLEXIBLE, FILIGREE SUN PROTECTION SOLUTION

fabric guided via a slat bar that slides laterally over tensioned stainless steel cords and securely guides and holds the durable, weather-resistant curtain in place. Comfortable operation through motorisation, radio control or automation.

BUILT-ON WIRETEX

**20° INCLINED
INSPECTION
FRONT**

**90° STRAIGHT

CABLE-GUIDED VERSION

IN CONNECTION WITH BUILT-ON BOXES

WIRETEX textile built-on sunprotection systems with filigree cable guide for new buildings and modernisations. With the small boxes without lateral guide rails, these are particularly well suited for retrofitting. The wide selection of box shapes and colours, as well as fabric variants, means that a suitable cloth/box combination can be found for every application.

Set accents

boxes available in all RAL colours in gloss, matt and textured paint coating or anodised version

Filigree lateral guidance

the curtain is guided on both sides via the connection between the slat bar and stainless steel cable

Easy inspection

the external inspection cover enables quick and clean service and repair work

Extruded and durable

ALUKON aluminium boxes are extruded, making them extremely robust and corrosion-resistant

DESIGN AND FLEXIBILITY

FOR THE HIGHEST DEMANDS

The modern and stylish type of flexible separation.
As a wind resistant weather protection for terraces and
roofing. Additional visibility provided
by an optional PVC viewing window.

ZIPTEX WITH VIEWING WINDOW

WIND AND WEATHER PROTECTION WITH A VIEW

ZipTex with a viewing window is a custom-made wind and weather protection system, especially on terrace roofs. The PVC viewing window can be integrated into more than 125 variants of Satiné, Veozip and SOLTIS cloths.

The transparent window film and the ZipTex curtain are welded together and are UV-resistant. The systems are equipped with convenient motor operation or alternatively crank operation.

PVC-FREE POLYESTER

NATURALLY TRANSPARENT

PLAY OF LIGHT AND SHADOW, TAILORED TO YOUR NEEDS

With ALUKON ZipTex, practically everything is possible. You'll find everything from translucent fabrics to single or multi-coloured curtain variants and darkening fabrics. Choose your preferred colour from the fabrics Satiné 5500, twilight PEARL 297, SOLTIS® 86, 92, B92 and Veozip. Even darkening systems can be implemented with the special darkening fabrics (SOLTIS® B92).

Depending on the cloth variant, visibility from the outside to the inside is also reduced or completely prevented at night. All Zip-Tex systems offer good protection against insects when closed.

FOR COLOUR DESIGN

FABRIC TYPES AND COLOURS

THE RIGHT ONE FOR EVERY WINDOW

You can choose freely from the ALUKON range of fabrics. In contrast to light fabrics, dark fabrics provide better protection against sunlight and glare, but also dampen the light conditions in the room more.

Privacy protection

more privacy in
your own home

Sun protection

pleasant indoor climate,
even on hot summer days

Glare protection

translucent fabric for
glare-free room atmosphere

Easy to care for and low-maintenance

through water- and
dirtrepellent curtains

CONVENIENT OPERATION

THE RIGHT ONE FOR EVERY APPLICATION

With a solar/wind control system, the systems can be controlled even when you're away from home and move fully automatically into the preset shading position with the defined level of sunlight.

Radio control

Radio drives with hand-held transmitters or timers offer additional convenience

Automation

with suitable drives, sun protection systems are Smart Home compatible and can be integrated into existing house controls

DESIGN WITH FUNCTION

CONVENIENT OPERATION

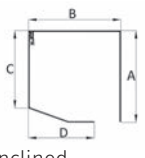

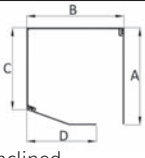

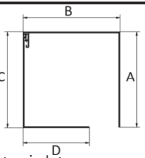

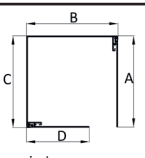

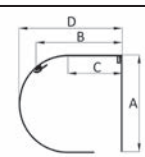

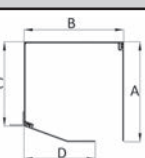

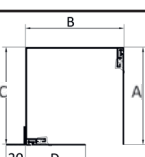

ZipTex and WireTex systems are always motorised and can be operated by switch as standard.

Optional radio drives with hand-held transmitters or timer offer additional comfort.
